Buyers Laboratory Inc. (BLI) - the leading global office equipment testing lab and business consumer advocate since 1961 - awarded performance certificate to Pioneer 80g, after subjecting it to its extensive runnability tests.

The BLI seal certifies that a product successfully completed demanding quality tests that proved its high working performance and that no problems with image quality, misfeeding, multi-sheet feeding, curl, dust accumulation or puckering were found. Working performance and image quality are two of the attributes most valued by office paper consumers.

Before awarding this certification, BLI carried out a series of thorough tests on Pioneer paper brand, using a wide range of office reproduction equipment (namely photocopiers, printers, faxes and multifunctional devices) from various manufacturers. As a case in point, GPS tested more than 4 million sheets in 90 different document imaging devices, from 14 different OEM's.

The Pioneer brand, launched in 2003, was the first Premium office paper in the world to be specifically designed for the female segment.

Currently sold in more than 40 countries, Pioneer already enjoys high recognition in several European countries, showing excellent results in terms of performance and printing quality. The Pioneer A4 80 g.m² has recently received the FSC certification. The brand supports the LAÇO Association, a Portuguese charity institution, since it was launched.

Since 1961, Buyers Laboratory Inc. (BLI) has been **the leading global independent office-equipment testing lab and business consumer advocate**. In addition to publishing the industry's most comprehensive and accurate test reports on office document imaging devices, each representing months of exhaustive hands-on testing in BLI's US and UK laboratories, the company has been the leading source for extensive runnability testing on imaging media and consumables, as well as extensive databases of specifications and pricing on copiers, printers, fax machines and multifunctional products. The company has a long-standing reputation for being **the industry's most trustworthy and complete source for quality testing services and global competitive intelligence**. For more information on BLI, visit www.buyerslab.com.
